Curriculum Vitæ

SUMMARY

Senior ML Research Engineer at Kandinsky Lab. Develops SFT and RLHF for Kandinsky 6.0 text-to-audio-video and image-to-audio-video. Previously built post-training and alignment for Kandinsky 5.0 and 4.1 image and video models. Strong mathematical background in optimization and loss-landscape geometry. Lecturer in deep learning and generative models.

Professional Skills.....

1. **Generative AI:** diffusion models, text-to-audio-video, image-to-audio-video, text-to-video, image-to-video, text-to-image, image-to-image, alignment (SFT, RLHF), controllable generation (ControlNet), adapters (IP-Adapter, Face-Adapter), style transfer, instruction-based image editing, image quality assessment.
2. **Computer Vision:** medical images reconstruction and forecasting (fMRI, EEG).
3. **Optimization:** sample size determination, loss landscape, decentralized optimization.

WORK EXPERIENCE

Kandinsky Lab, Sber

Senior Research Engineer

Kandinsky 6.0 (text-to-audio-video, image-to-audio-video):

- Post-Training: SFT.
- Alignment: RLHF.

Moscow, Russia

Aug 2026 – Present

Kandinsky Lab, Sber

Research Engineer

Kandinsky 5.0 (text-to-image, image-to-image):

- Post-Training: SFT, Instruct SFT.
- Alignment: RLHF (DPO, DRAFT, GRPO, DGPO).
- Applications: Text Rendering, Interior Design, Stylization.

Kandinsky 4.1 (text-to-image, text-to-video, image-to-video):

- Performed text-to-image SFT via innovative LoRA-Soup technique, significantly improved image generation quality.
- Text-to-video LoRA fine-tuning for Russian culture code. Trained 70+ LoRA adapters on different characters, distilled them into text-to-video generation of Kandinsky 4.1.
- Image-to-video generation of Kandinsky 4.1. Developed a new architecture and trained the model maintaining structural dynamics.

Moscow, Russia

Jan 2025 – Jul 2026

Research Intern

Jun 2024 – Dec 2024

Kandinsky Image Editing:

- Interior Design with Kandinsky 3 ControlNet for Domclick. Fine-tuned ControlNet on the interiors domain, implemented regional prompting for arbitrary segmentation masks and utilized ControlNet image2image editing.
- Kandinsky 3 ControlNet Style (DepthPro) that outperforms ControlNet Union SDXL by 100% on ImageReward. Trained ControlNet over 300k steps on the 3M dataset, used DepthPro condition for the best image preserving and style editing.

Research Center for Artificial Intelligence, Innopolis University

Mathematician-programmer

- Research work in the field of optimization

Innopolis, Russia

Sep 2024 – Jul 2025

Laboratory of Mathematical Methods of Optimization, MIPT

Technician

- Research work in the field of optimization
- Decentralized optimization with coupled constraints
- Network design problem

Moscow, Russia

Oct 2023 – Apr 2024

EDUCATION

Moscow Institute of Physics and Technology

PhD in Artificial Intelligence and Machine Learning

Moscow, Russia

Sep 2026 – Present

- Thesis: Scaling of Parametric Machine Learning Models Based on the Local Geometry of the Optimization Surface
- Advisor: Andrey Grabovoy, PhD

Moscow Institute of Physics and Technology

MSc in Computer Science

Moscow, Russia

Sep 2024 – Aug 2026

- Thesis: Sample Size Determination for Parametric Models
- Advisor: Andrey Grabovoy, PhD
- GPA: 5/5

Moscow Institute of Physics and Technology

BSc in Applied Mathematics and Physics

Moscow, Russia

Sep 2020 – Aug 2024

- Thesis: Bayesian Sample Size Estimation
- Advisor: Andrey Grabovoy, PhD
- GPA: 4.88/5 (with honours)

PUBLICATIONS

Technical Reports.....

POSTER SESSIONS

- December 10, 2025
Kandinsky 5.0 Image Post-Train: SFT & RLHF
Salute, Giga!
- October 21, 2024
Spatio-Temporal fMRI Analysis in Visual Stimuli Decoding: Linear Model Forecasting & Voxel Weighing
Neuroinformatics 2024

TALKS

- September 28, 2026
Subspace of Maximum Curvature for Loss Landscape Stabilization
16th International Conference on Intellectual Data Processing
- May 29, 2026
Adaptive Selection of the Gaussian Sampling Scale for Monte Carlo Estimation of Loss-Landscape Convergence
Ivannikov Memorial Workshop

- April 4, 2026
A mean-square criterion for loss-landscape convergence based on the leading eigenspace of the Hessian
68th MIPT All-Russian Scientific Conference
- December 10, 2025
Robust Convergence of Loss Landscapes through Distributional Averaging
2025 Ivannikov ISPRAS Open Conference (ISPRAS)
- December 10, 2025
Kandinsky: image and video diffusion models fine-tuning for personalization
Salute, Giga!
- November 20, 2025
Kandinsky: launching and fine-tuning image and video generation models
AI Journey 2025
- September 25, 2025
Sufficient sample size and its connection to the loss landscape convergence
22nd All-Russian Conference on Mathematical Methods for Pattern Recognition
- September 25, 2025
Decoding visual stimuli from multimodal brain signals
22nd All-Russian Conference on Mathematical Methods for Pattern Recognition
- April 5, 2025
Loss landscape convergence as an indicator of sufficient sample size
67th MIPT All-Russian Scientific Conference
- December 12, 2024
Hessian-based convergence analysis of convolutional network loss landscapes
2024 Ivannikov ISPRAS Open Conference (ISPRAS)
- April 6, 2024
Determining a sufficient sample size from the posterior distribution of model parameters
66th MIPT All-Russian Scientific Conference
- April 6, 2024
Spatial-temporal methods for time series analysis
66th MIPT All-Russian Scientific Conference

TEACHING

My First Scientific Paper

Teaching assistant

Moscow Institute of Physics and Technology

Sep 2025 – Present

- Playlists: Spring 2026, Spring 2025.

Diffusion Models

Instructor

Standard Data × Sber University

Nov 2024 – Present

- Implementation Details: DDIM, noise schedulers, guidance overexposure, noise offset, multiple text encoders, transformer-based diffusion models, MM-DiT.
- Video Diffusion Models: Deforum, AnimateDiff, Wan.

Deep Learning

Course organizer, Instructor

Moscow Institute of Physics and Technology

Sep 2024 – Present

- Optimization, Regularization.
- Initialization, Normalization, CNN.
- Generative Models: Autoregression, VAE, GAN, Diffusion, Flow Matching.
- Acceleration: Quantization, Pruning, Distillation, KV-Cache, Flash Attention.
- Playlists: Fall 2026, Fall 2025, Fall 2024.

PROJECTS

○ HippoTrainer: Gradient-Based Hyperparameter Optimization

A Python library for gradient-based hyperparameter optimization, implementing cutting-edge al-

gorithms that leverage automatic differentiation to efficiently tune hyperparameters.

- **Just Relax It: Discrete Variables Relaxation**

A cutting-edge Python library designed to streamline the optimization of discrete probability distributions in neural networks, offering a suite of advanced relaxation techniques compatible with PyTorch.

- **Models of epidemic spread, in particular COVID-19 as a model of stochastic chemical kinetics**
Various approaches to modeling the spread of epidemics, differential equations and Markov processes
- **Optimization methods for quadratic problems with large dimensionality**
Comparison of different methods of solving high-dimensional linear regression problems
- **Intelligent Presentation Generator**
Application for generating presentations based on text files using topic modeling

ACHIEVEMENTS

- **Fall 2026-2027:**
 - Russian Presidential Scholarship
- **Spring 2025-2026:**
 - Russian Presidential Scholarship
 - Sber Scholarship Program (Top-91 students in Russia)
 - K.V. Rudakov scientific academic scholarship for research activities in the field of applied mathematics
 - Increased State Academic Scholarship for 4 year bachelor and master students at MIPT
- **Fall 2025-2026:**
 - Russian Presidential Scholarship
 - Sber Scholarship Program (Top-91 students in Russia)
 - K.V. Rudakov scientific academic scholarship for research activities in the field of applied mathematics
 - Increased State Academic Scholarship for 4 year bachelor and master students at MIPT
- **Spring 2024-2025:**
 - K.V. Rudakov scientific academic scholarship for research activities in the field of applied mathematics
 - Personal scholarship for contributions to the development of numerical optimization methods
 - Increased State Academic Scholarship for 4 year bachelor and master students at MIPT
- **Fall 2024-2025:**
 - K.V. Rudakov scientific academic scholarship for research activities in the field of applied mathematics
 - Personal scholarship for contributions to the development of numerical optimization methods
 - Increased State Academic Scholarship for 4 year bachelor and master students at MIPT
- **Spring 2023-2024:**
 - Personal scholarship for contributions to the development of numerical optimization methods
- **Fall 2023-2024:**
 - K.V. Rudakov scientific academic scholarship for research activities in the field of applied mathematics
 - Personal scholarship for contributions to the development of numerical optimization methods
- **2020-2023:**
 - Abramov scholarship for 1-3 year bachelor students with the best grades at MIPT

CERTIFICATIONS

- **Statistics for data analysis**
Coursera, Issued Jan 2022, Credential ID KAQRGNCQJ8AH
- **Unsupervised learning**
Coursera, Issued Jan 2022, Credential ID 3CTYTEFT48FM

- **Supervised learning**
Coursera, Issued Jan 2022, Credential ID 2ZBSN8L7EAVV
- **Mathematics and Python**
Coursera, Issued Oct 2021, Credential ID CSTTGDM8RF2V

SKILLS

- **DL:** PyTorch, Huggingface, Accelerate, Multi-GPU training: DDP/FSDP/SP/TP, W&B, TensorBoard
- **ML:** NumPy, SciPy, Pandas, NetworkX, Scikit-learn, LightGBM, CatBoost
- **OS:** macOS, Linux, Windows
- **Misc.:** Git, Bash, $\LaTeX$
- **Soft Skills:** responsible, organized, critical thinker, flexible, communicative, team player, patient

LANGUAGES

- Russian (Native)
- English (Advanced)

INTERESTS

- Coffee, Wine, Jazz
- Classic Guitar
- Gym, Hiking
- Traveling
